React - The Complete Guide 2024 (incl. Next.js, Redux)
Udemy

PROJECTS

Blood Bank Management with Chatbot
I have developed a comprehensive blood bank management system with a built-in chatbot, designed to streamline the process of finding the nearest blood donor. Using PHP and MySQL, This system can be a lifesaver in critical situations, ensuring that blood donations are managed effectively and that help is always close at hand.

Motion Art Effect ⧉
I created a magical smoke background that adds an enchanting touch to any ReactJS project. This visually captivating background can be used in various real-world applications, such as ad pop-ups to grab user attention, or even in event websites to add a magical atmosphere. Imagine using this background for a Halloween-themed website, making it both engaging and visually stunning for your visitors.

INTERNSHIP

Teqjass Software Solution ⧉   May 2022 – Apr 2024 │ Bangalore, India
Junior Full Stack Intern
I worked on real-world projects during my internship under the mentorship of the Senior Developer. I worked on a social media web app called Qoneqt, where I dealt with web designing and APIs.
